IN THIS ISSUE

On our cover this month is astronomer-observer George Abell, guiding the Big Schmidt telescope in its work of mapping the heavens for the National Geographic Society-Palomar Observatory Sky Survey. You'll find the story about this impressive atlas of the skies on page 13 of this issue.

Next to smog, water shortages present the most serious challenge to the ultimate growth of Southern California. On page 21, in "Looking Ahead for Water," Jack E. McKeen, Associate Professor of Sanitary Engineering, considers some possible new sources of water supply for this area. Dr. McKeen, incidentally, has just completed the first year of research on one of the phases of the problem of sewage reclamation, in an effort to develop an economic engineering method for the disinfection of sewage.

Prizewinners in the 1954-55 E&S Science Writing Contest, for Caltech undergraduates and graduate students, were selected by the editors of Scientific American this summer. The $100 first prize went to Frank Salisbury for "The Inhabitants of Mars," which ran in E&S in April, 1955. Second prize ($50) went to James M. Kendall for "Hypersonic Research at Caltech," which we published in June, 1954.

Salisbury, who received his Ph.D. from Caltech last June in plant physiology and geochemistry, is now teaching at Colorado A & M. Kendall is still on campus, as a graduate teaching assistant in aeronautics.

OCTOBER, 1955  VOLUME XIX  NUMBER 1

PUBLISHED AT THE CALIFORNIA INSTITUTE OF TECHNOLOGY

CONTENTS

In This Issue 3
Books 8

A Map of the Universe 13
After seven years of hard work, a new milestone in astronomical history has been reached with the publication of this new chart of the skies.

A New Source of Uranium 17
Caltech investigators find a way to extract the atomic energy fuels, uranium and thorium, from the ordinary granites of the earth's crust.

The Summer at Caltech 18
Freshman Camp, 1955 21
A pictorial record

Looking Ahead for Water 24
Can southern California keep growing indefinitely without fear of a water shortage? Here's what engineers and scientists are doing to meet the inevitable problem.
by Jack E. McKeen

What's New About the New Cars 32
by Peter Kyropoulos

Family Album 34
An informal report on some of the graduate students whose work has been financed by the Arthur McCallum Fellowship and Scholarship program.

How Do You Like Your Job? 38
A reminder that the Caltech Alumni Placement Service can help you do something about it
by Donald S. Clark

Personals 42
Alumni Fund 48
