Your Caltech Alumni Fund reached $117,306.07 on June 1, 1952. Of this, $32,728.80 was the result of the fifth year’s efforts. A total of 1,459 alumni contributed $27,422.67 during this year, which, together with special contribution and interest, reached the above figure.

The alumni can well be proud of this fund. It represents a sincere desire on the part of those who have contributed to be of material assistance to Caltech. It also represents a lot of hard work on the part of the Fund committee, which has organized and carried this effort along over the past five years. The Fund must also represent a welcome source of money to the Institute for those selected projects on which it is used.

It has been determined that the first use of this Fund will be for the construction of a swimming pool and locker rooms at Tournament Park. Plans are being drawn. The previously anticipated allocation of steel for the fourth quarter of 1952 has been postponed by the recent steel strike. Although the actual start of construction is indefinite at this time, it is reasonable to expect that ground will be broken within the coming year.

The Fund committee hopes that the coming year will see the Fund grow even more than it did during the past year, and that it will be looked upon by all of the alumni as their opportunity to make a lasting contribution to the Institute.

Undergraduate contributions received by the Fund during the last year are tabulated below. Class rankings are also shown. In the last two columns of the table below the 39 classes are ranked according to the size of their average gifts, and according to the percentage of each class that contributed. The names of all 1951-52 contributors are listed on the following pages.

—K. E. Kingman
Director in charge of the Alumni Fund

FIFTH YEAR—1951-52

BE AN EXPERT ON BEARINGS

...latest data on how to select anti-friction bearings

Special Price to Engineering Students

Engineers... draftsmen... designers... all know the slide rule is an all-important "tool" but certainly no more efficient than their ability to make full use of it. Don't invite eye-fatigue and impair job performance with poor illumination.

Smoother lighting equipment can solve this problem—as it has for thousands of workers in other western plants. Made to exacting quality standards, it provides illumination always ample, always correct for the eyes—light that's a perfect partner for production.

Equally important, there is a Smoother Holman fixture to match any job's specific need! See your Smoother Holman Lighting Engineer!

Smoother Holman Company, Inglewood, Calif. Officers in Principal Western Cities - Branch or Agency in San Francisco.

GOOD LIGHTING...as important as your most important tool

**AUDITOR'S REPORT**

In my opinion, the accompanying balance sheet and statement of income present fairly the financial position of Alumni Association California Institute of Technology at June 30, 1952 and the results of its operations for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Howard W. Finney
