

ENGINEERING AND SCIENCE

IN THIS ISSUE

ON OUR COVER this month is the Throop Club Eiffel Tower, built for this year's Interhouse Dance. The tower stayed up, a graceful addition to the campus, until it was finally sold this month to the Moulin Rouge nightclub in Hollywood.

The silver tower was 36 ft. high (and would have been even higher if the Pasadena Building Department didn't have a height limit for this area). It took about 600 man-hours of labor, cost \$350, and was built to scale—from an old *Life* photograph.

The Eiffel Tower was the most memorable thing about the Interhouse Dance this fall, and there is another view of it on page 39—where you will find pictures of some of the other memorable student events of the First Term, 1957-58.

"AN AMERICAN GENETICIST in the USSR," on page 27 of this issue, has been adapted from a Friday Evening Demonstration Lecture given by Norman H. Horowitz, professor of biology, on November 1.
