

## CIT ON TV

TV TOOK A WHIRLWIND TOUR of the Caltech campus last month and covered the ground in 30 minutes, less commercials, on the Richfield Oil Corporation's "Success Story" program. Some of the highlights of the tour are shown on these pages.

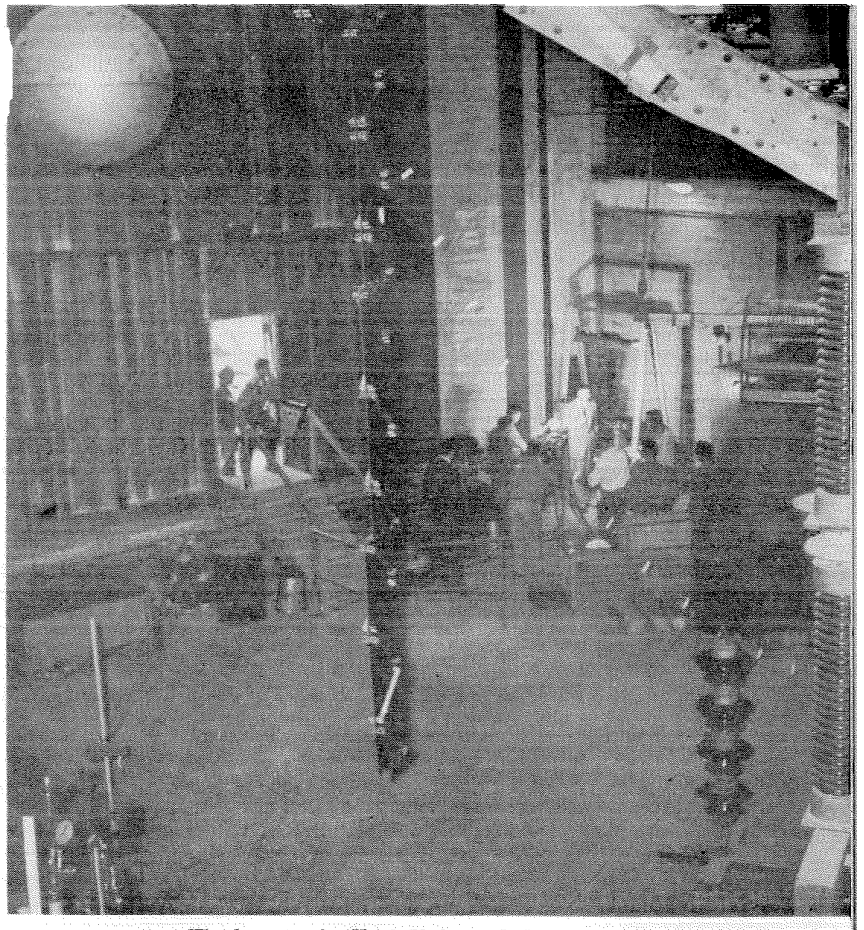

Dr. Linus Pauling (left), chairman of the Division of Chemistry and Chemical Engineering, demonstrated and described some of his molecular models. Dr. Milton Plesset (waiting for his cue in the picture at lower left), professor of applied mechanics, ran a cavitation test in the Hydrodynamics Laboratory. And the million-volt synchrotron sat for its portrait (below).

**Around the campus  
in 30 minutes**

*Dr. A. J. Haagen-Smit  
describes some of  
the effects of smog*

*Workers in the High Voltage Laboratory prepare  
to produce some artificial lightning*

*TV cameras move in for a close-  
up of a Palomar photograph*
