

# ENGINEERING AND SCIENCE

## IN THIS ISSUE

ON OUR COVER—Dr. James Savage, one of the seven Caltech geologists who set up a research project last summer on the Blue Glacier in northwestern Washington. Dr. Savage is working at the bore hole site near the middle of the glacier, where pipe is driven down through the ice to check the glacier's flow.

The Blue Glacier Project is part of the IGY program, and is under the direction of Robert P. Sharp, professor of geology and chairman of the division of geological sciences. You'll find some of his crew and some of their activities pictured on pages 18 and 19.

THEODORE M. GREENE, professor of the humanities at Scripps College, visited the Caltech campus from December 3-5 as a guest of the YMCA. An author and lecturer in the philosophy of religion, art and education, Dr. Greene spent much of his time here in discussions with students, but also gave some formal talks—like the provocative sample on page 13.

## CONTENTS

In This Issue	3
Major Philosophical Issues of the Modern Age	13
<i>A consideration of some of the things that trouble us most in our most thoughtful moments today</i> by Theodore M. Greene	
Blue Glacier Project	18
<i>Caltech starts a comprehensive study of a glacier in the shadow of Mount Olympus</i>	
The First Shots Into Interplanetary Space	20
<i>A research project that may pave the way for direct experimentation with the planets and their satellites</i> by Fritz Zwicky	
An Anniversary	28
<i>Caltech chemists celebrate the 40th anniversary of the publication of the first American papers on x-ray crystallography</i>	
The Month at Caltech	32
Alumni News	36
Personals	40
