

LISTEN

A back-of-the-envelope calculation works 99 times out of 100.

How much work I could get done at the last minute.

A Caltech alum can learn to do anything.

The honor system! It has ruled my life . . . and my golf game.

Surrounding yourself with smart people really *does* make you smarter.

Bohnenblust's admonition that no partial credit would be given:

"When the bridge falls down, no one cares that you used the right formula."

Don't wait until you get your PhD to get married if the right person comes along.

There are "rules," and then there are the real rules. You solve problems by not following the "rules."

Hardy Martel [BS '49, PhD '56] taught me how to model a system: "Assume the hell out of it until you can solve it. Then add the bells and whistles."

Work hard, but take interesting vacations.

Never say, "I'll never use this stuff. Why do I have to take this course?"
