

Coursera by the Numbers

Coursera is an online learning platform founded in 2011 by Stanford computer-science professors Daphne Koller and Andrew Ng; it uses video presentations, active discussion groups, and interactive exercises to encourage learning and ensure long-term retention of the material. Classes are not for credit. Caltech began offering lessons to students and members of the general public via Coursera in the fall semester of 2012.

DURING THE SPRING SEMESTER OF 2013 <
